2004 TITAN (A60) REAR FINAL DRIVE GEAR OIL SPECIFICATION CHANGE

APPLIED VEHICLE: All 2004 Titan (A60)

SERVICE INFORMATION:

The rear final drive gear oil specification (for all 2004 Titans) has been changed. The new gear oil is Nissan Synthetic Gear Oil (SAE 75W-140), P/N 999MP-DF100P.

New		Old	
Part Number	Description	Part Number	Description
999MP-DF100P	Nissan Synthetic Gear Oil (SAE 75W-140)	N/A	API GL-5 Viscosity SAE 80W-90

IMPORTANT:

- Nissan Synthetic Gear Oil (SAE 75W-140) must be used when performing rear final drive repairs paid by Nissan. These include warranty, service contract, or goodwill repairs.
- Nissan will not reimburse dealers for rear final drive repairs when Nissan Synthetic Gear Oil (SAE 75W-140) is not used.

Maintenance Interval:

- If a rear final drive requires the oil be drained for maintenance or repair (customer pay work), Nissan recommends this new gear oil (Nissan Synthetic Gear Oil SAE 75W-140) be used as the service fill oil.
- The maintenance requirement for the Nissan Titan used under normal driving conditions is unchanged. However, as indicated in the 2004 ESM (revision: January 2005 / publication: SM4E-1A60U2), when towing a trailer, using a car top carrier or driving on rough or muddy roads, Nissan strongly recommends that the rear final drive gear oil be drained and replaced with Nissan Genuine 75W-140 synthetic gear oil every 30,000 miles or 24 months (which ever comes first).
- See the Nissan Service and Maintenance Guide located in the portfolio/glovebox, not the owner's manual.

Nissan Rear Final Drive Gear Oil and all Nissan chemicals are ordered through the Direct Ship Chemical Care Product Program:

- Phone: 1.800.811.0502
