2004 TITAN AND PATHFINDER ARMADA ELECTRIC TRAILER BRAKE JUMPER HARNESS

This bulletin amends NTB03-101. This version amends the Applied Vehicles.
Please discard all paper copies of the earlier version.

APPLIED VEHICLES: 2004 Pathfinder Armada (TA60)
2004 Titan (A60)

SERVICE INFORMATION

Applied Vehicles equipped with the trailer towing package:

- Are supplied with a jumper harness for use with an electric trailer brake controller (see Figure 1).
- This jumper harness is placed in the glove box at the factory.

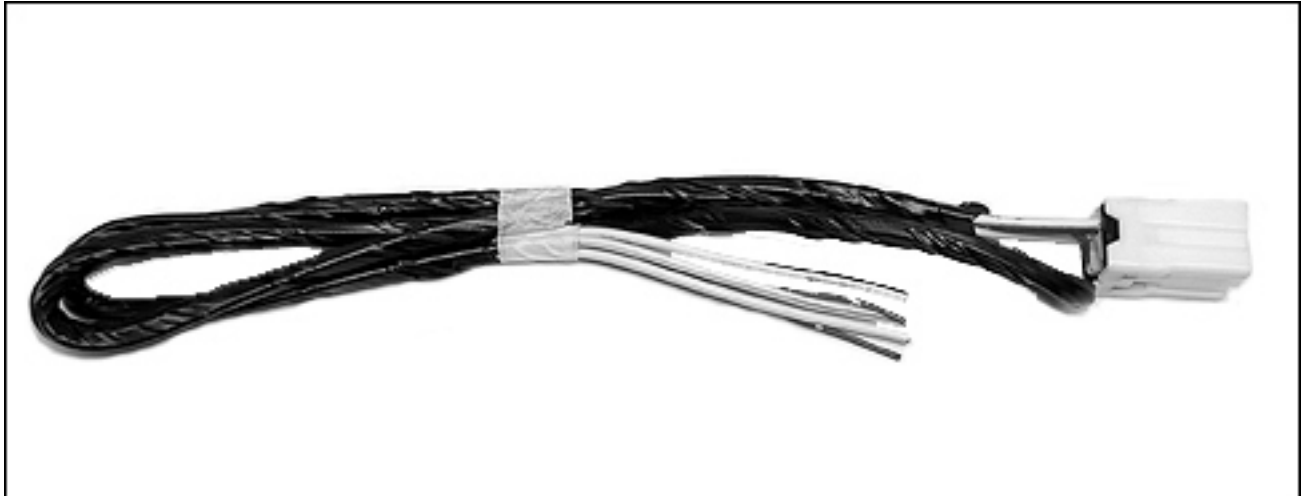

Figure 1

- This jumper harness is used to connect an electric trailer brake controller to the vehicle harness.
- Trailer brake controllers are not available through Nissan. They must be purchased separately.

CAUTION:

Only install this jumper harness if you are installing a trailer brake controller at the same time.

Jumper Harness Connection to Electric Trailer Brake Controller

- Before connecting the jumper harness to the vehicle, wire it to the brake controller.
- Use the instructions supplied with the brake controller and the information in this table.

Jumper Harness WIRE COLOR	NOTE:
Red / Green	Vehicle Stop Lamp Switch to Trailer Brake Controller
Black	Ground: For Trailer Brake Controller
Brown / White	Trailer Brake Controller Output to Trailer Brakes
Red / Blue	Trailer Brake Controller Illumination (with lights ON)
Red	Fused 12V Power Supply: For Trailer Brake Controller

Jumper Harness Connection to the Vehicle Harness

- The vehicle harness connector is located under the dash on the driver's side (see Figure 2).
- Pushing/applying the parking brake will make it easier to see the connector.

Figure 2

- The connector is taped in place (see Figure 3).
